Steve Kunitzky

STEVE'S WISH

The Stephen J Kunitzky Fund was originated to help Steve pay his medical bills. In January 2008, after a long and exhaustive battle, Stephen J. Kunitzky, 25, lost his life to cancer. As per his wishes, **The Fund will continue.** Only now, your contribution will help to pay the bills of others in situations similar to Steve's.

STEVE KUNITZKY (01-07-83 to 01-26-08)

THE STORY In November of 2006, three weeks before graduating from the Delaware County Municipal Police Academy, Steve was diagnosed with a very rare and very aggressive disease called neuroendocrine cancer. He and his fiancée Antonia pursued every existing course of action. He underwent surgery, dietary changes, and countless rounds of chemo and radiation therapies. For a short period of time, Steve actually was declared cancer-free. Sadly, it didn't last long.

The disease returned and was stronger than ever. It grew in his back, in his neck, and near his lungs, and didn't appear to be slowing down. Treatments continued. Second opinions were sought. A variety of hospitals were visited. The cancer continued to grow. Shortly after Christmas 2007, Steve was readmitted into the hospital due to tumor growth and facial paralysis. He was later moved to the University of Pennsylvania with the hopes that they could offer a miracle. On January 26th, 2008, Steve died comfortably in his sleep surrounded by his loved ones.

Steve was an amazing human being with a true passion for life. He loved his friends and his family with his whole heart, and taught us all how to love each other. Even in his final hours, he was more concerned with the well-being of those around him than of himself.

The Stephen J Kunitzky Fund was started to help Steve repay his astronomical medical bills, and now, as per Steve's wishes, will continue and help others in similar situations. If you would like to make a contribution to the fund, please do so. If you know of someone in need, please send us an email. Thank you so much.
